Asset Recovery Services

Simplify the recovery of technology assets; telecom, IT, networking and optical transmission.

MULTIMESSAGE

Enhancing Operational Efficiencies

**Repairs, prestaging & logistics for the telecommunications & IT industry**

Optimise hardware, recover value, or securely dispose

Asset recovery simplified

Multimessage simplify the process of managing obsolete or end of support assets, using our fully managed end-to-end asset recovery service. This ensures our customers optimise recovered hardware and reuse it for existing contracts, or resell / recycle for the greatest benefit to the company and the environment.

Hardware lifecycle

Asset recovery is just one aspect of our **'Hardware lifecycle services'**, ensuring we support the full product lifecycle – enabling partners to be more efficient and sustainable. Multimessage is ISO14001 certified for our environmental management systems.

MULTIMESSAGE

Commercial benefits

• Offset costs of recovery against equipment value.

• Reuse critical assets to replenish maintenance stock, reducing CAPEX.

• Sell any assets with a market value.

Sustainability benefits

• Extend lifecycle of equipment, reuse or resell, instead of sending for recycling.

• Equipment managed by Multimessage with no commercial value is recycled and we ensure full WEEE compliance for assets disposed of.

Why Multimessage?

ISO14001 certified, Multimessage recovery and management of obsolete assets is a vital part of the circular economy and we ensure security of data, regulatory compliance for WEEE disposal and improve sustainability and environmental performance for our partners.

Take ownership, so new solutions include the recovery of redundant assets.

Recover — Professional and experienced team recover equipment as agreed from site.

Review — Multimessage report a full inventory of recovered assets, analyse condition and decide on next process.

Reuse — Test and replenish stock levels to support existing contracts.

Resale — Remarket equipment, achieving the best return for assets with commercial value.

Recycle — Securely WEEE Recycle redundant equipment with no sell-on value.

Partner feedback

Multimessage provide us with a service that sees most of our upgraded legacy equipment, being sent off for recycling or to be reused in another application. This allows us to limit our waste and prevent good equipment going to landfill. Ultimately, working together with Multimessage, we are reducing our impact on the environment.
